

MultiOption® Guide B Series Variable Annuity

All performance results are through the period ending March 31, 2024

Performance shown prior to the product effective date, October 25, 2012, and performance prior to the portfolio's inception as a subaccount is hypothetical and, unless otherwise noted, is calculated by applying the contract expenses and charges to the underlying portfolio's performance. In these instances, performance shown predates the offering of the portfolio as an investment option in the variable annuity.

Money Market Yield for 7 days ending 03/31/2024
7 day current yield: 5.36%
7 day effective yield: 5.51%

The Money Market Portfolio's current yield is based on investment income for the 7-day period. The effective yield assumes reinvested income. The yield quotation more closely reflects the current earnings of the money market fund than the total return quotation.

¹ Non-standardized performance shown for periods prior to the inception of the share class used in this product is hypothetical and reflects the historical results of the underlying share class adjusted to reflect the impact Rule 12b-1 Distribution Plan fees would have had on that share class had the share class then existed. The share classes invest in the same portfolio of securities and will have similar performance, except to the extent that expenses borne by each class differ.

² Non-standardized performance shown for periods prior to the inception of the share class used in this product is hypothetical and reflects the historical results of the underlying share class with the contract expenses applied to that share class' performance. Returns listed would be lower if the actual share class available had existed because expenses in the share class available in this product are higher than the expenses in the underlying share class.

³ Certain performance information for this portfolio is currently unavailable as the portfolio's sub-account inception date postdates the above performance results.

The Invesco V.I. Equity & Income Series II Shares portfolio's performance would have been lower had fees not been waived and/or expenses reimbursed.

Effective May 2, 2011, Invesco V.I. Basic Balanced Series II Shares subaccount merged into the Invesco Van Kampen V.I. Equity & Income Series II Shares subaccount. Non-standardized performance prior to 1/24/2002 is hypothetical based on the Invesco V.I. Basic Balanced Series I Shares which have lower expenses and therefore returns shown would be lower had the actual share class available then existed. Non-standardized performance from 1/24/2002 to 5/1/2002 is hypothetical based on the Invesco V.I. Basic Balanced Series II Shares prior to its addition to the product. Non-standardized performance from 5/1/2002 to 5/2/2011 is based on the Invesco V.I. Basic Balanced Series II Shares subaccount. Standardized performance from 5/1/2002 to 5/2/2011 is based on the Invesco V.I. Basic Balanced Series II Shares subaccount. Perkins Investment Management LLC is a subsidiary of Janus Henderson Group plc and serves as the sub-adviser on certain products.

The Delaware Ivy VIP Pathfinder Managed Volatility Portfolios' investment manager, Delaware Management Company (DMC), manages the investments in the underlying funds. An investment sub-advisor, Securian Asset Management, Inc., manages the volatility management strategy.

The performance of each Delaware Ivy VIP Pathfinder Portfolio is dependent on the performance of its underlying funds, and each Portfolio will assume the risks associated with its underlying funds. Because an investor is investing in funds indirectly through the Portfolio, the investor will pay a proportionate share of the applicable expenses of the underlying funds, as well as the expenses of the particular Portfolio. Please consult the prospectus for additional information about fees and expenses.

The Morningstar ETF Allocation Series Portfolios are not Exchange Traded Funds (ETFs), instead they consist of five risk-based asset allocation portfolios that invest in underlying ETFs, which are typically open-end investment companies or unit investment trusts. ETFs entail the same risks as direct stock ownership and portfolios structured as "fund of funds" will entail the same risks associated with the underlying funds and may have higher expenses than underlying funds purchased directly in the Separate Account.

The Ivy Variable Insurance Portfolios, Inc. are managed by Delaware Management Company (DMC) and distributed by Delaware Distributors, L.P.

The TOPS® Target Range™ Portfolios are managed by ValMark Advisers, Inc. and distributed by Northern Lights Distributors, LLC. and Milliman Financial Risk Management, LLC serves as the sub-advisor. Here is a list of the risks associated with the variable insurance product's underlying investment choices. For specific risks related to each investment, see the prospectus.

The asset classes used here are provided by Securian Financial Services, Inc. (Securian Financial Services). Securian Financial Services reviews and updates the analysis on an annual basis. Securian Financial Services uses holdings based analysis as the primary determinant of investment style and asset class, but may supplement this analysis with returns based style analysis or qualitative information. Holdings based analysis is a technique that analyzes the underlying holdings of a fund to identify the overall style of the fund at a point in time or over a particular time period. Because the funds are classified according to their actual underlying holdings, the classification may not correspond to the stated investment style as described by the fund's prospectus or other documents or by other ranking firms. A fund's asset class category is subject to change at any time. **You should read the fund's prospectus carefully to understand the risks and objectives of the fund before you invest in it.**

Asset Allocation: Neither diversification nor asset allocation guarantee against loss, they are methods used to manage risk. Because these funds deploy an asset allocation strategy, investment risks may vary. One should consult the prospectus for details.

Emerging Markets: Investments in emerging markets involve heightened risks due to their smaller size, decreased liquidity and exposure to political turmoil or rapid changes in economic conditions not normally experienced by more developed countries.

High Yield: High yield, lower-rated (junk) bonds generally have greater price swings and higher default risks. Debt obligations are affected by changes in interest rates and the creditworthiness of their issuers.

International Bond: Investment risks associated with international investing, in addition to other risks, may include currency fluctuations, political, social and economic instability and differences in accounting standards when investing in foreign markets. Debt obligations are affected by changes in interest rates and the creditworthiness of their issuers.

International Large Cap: Investment risks associated with international investing, in addition to other risks, may include currency fluctuations, political, social and economic instability and differences in accounting standards when investing in foreign markets.

International Small Cap: Investments in small, mid or micro cap companies involve greater risks not associated with investing in more established companies, such as business risk, stock price fluctuations, increased sensitivity to changing economic conditions, less certain growth prospects and illiquidity. Investment risks associated with international investing, in addition to other risks, may include currency fluctuations, political, social and economic instability and differences in accounting standards when investing in foreign markets.

Managed Volatility: Although Managed Volatility Portfolios seek to minimize the impact of market downturns, their hedging strategies may limit some upside potential. As with any variable investment, investing in Managed Volatility Portfolios involves investment risk, including the loss of principal. Neither diversification nor asset allocation guarantee against loss, they are methods used to manage risk. Because these funds deploy an asset allocation strategy, investment risks may vary. One should consult the prospectus for details.

Natural Resources & Commodities: Investments in commodities and natural resources involve heightened risk due to leveraging and speculative investment practices, lack of periodic valuation requirements and potentially complex tax structures.

Real Estate Equities: Investment risks associated with real estate investing, in addition to other risks, include rental income fluctuation, depreciation, property tax value changes, and differences in real estate market values.

Sector: Investments that focus in one sector may involve a greater degree of risk and volatility than an investment with greater diversification.

Small/Mid Cap Growth, Small/Mid Cap Value and Small/Mid Cap Blend: Investments in small, mid or micro cap companies involve greater risks not associated with investing in more established companies, such as business risk, stock price fluctuations, increased sensitivity to changing economic conditions, less certain growth prospects and illiquidity.

U.S. Domestic Short/Intermediate/Long-Term Bond: Investments in fixed income securities are subject to the creditworthiness of their issuers and interest rate risk. As such, the net asset value of bond and real estate funds will fall as interest rates rise.

Some products and optional features or benefits may not be available in all states; features or benefits may vary by state. Variable products not available in New York.

ⁱ Inception Date is the portfolio's inception date and may precede the date the portfolio was added to the Separate Account. Performance prior to the portfolio being added to the Separate Account is hypothetical and reflects the historical results for the underlying funds offered in this product.

Non-Standardized Not Surrendered Performance: Includes 1.35% Total Separate Account Charges and the applicable Fund Operating Expenses and Distribution Fees. Contingent deferred sales charges and charges for the optional features available have not been deducted in the calculations.

Non-Standardized Surrendered and Standardized Performance: The average total returns reflect the deduction of all applicable contract expenses and charges (excluding the cost of any optional benefits if available). Returns shown when assuming the contract surrendered also reflect the deduction of applicable Deferred Sales Charge. The maximum Deferred Sales Charge for each purchase payment is 8% decreasing over 7 years.

The total annual Separate Account expenses during the annuity income payout phase are 1.35%. There is no deferred sales charge during the annuity income payout phase.

The guarantees in MultiOption Guide B are subject to the financial strength and claims paying ability of Minnesota Life. The guarantees have no bearing on the performance of the variable investment options. We reserve the right to limit or discontinue acceptance of future purchase payments after the contract is issued. This may limit the ability to increase the contract value through additional purchase payments. If an optional benefit is elected in the contract, this may also limit the ability to increase the value used to calculate the optional benefit.

This must be preceded or accompanied by a current variable annuity prospectus. You should consider the investment objectives, risks, charges and expenses of a portfolio and the variable insurance product carefully before investing. The portfolio and variable insurance product prospectuses contain this and other information. Please read the prospectuses carefully before investing.

The performance information shown reflects historical results. Past performance does not guarantee future results and current performance may be lower or higher than the performance data quoted. Investment return and principal value of an investment will fluctuate so that the value of the accumulation units, when redeemed, may be worth more or less than the original cost. You can obtain the most recent month end performance if not shown here, by calling 800-362-3141.

An annuity is intended to be a long-term, tax-deferred retirement vehicle. Earnings are taxable as ordinary income when distributed, and if withdrawn before age 59 1/2, may be subject to a 10% federal tax penalty. If the annuity will fund an IRA or other tax qualified plan, the tax deferral feature offers no additional value. Qualified distributions from a Roth IRA are generally excluded from gross income, but taxes and penalties may apply to non-qualified distributions. Please consult a tax advisor for specific information. There are charges and expenses associated with annuities, such as deferred sales charges for early withdrawals. Variable annuities have additional expenses such as mortality and expense risk, administrative charge, investment management fees and rider fees. Variable sub accounts of annuities are subject to market fluctuation, investment risk and loss of principal.

Insurance products are issued by Minnesota Life Insurance Company in all states except New York. In New York, products are issued by Securian Life Insurance Company, a New York authorized insurer. Minnesota Life is not an authorized New York insurer and does not do insurance business in New York. Both companies are headquartered in St. Paul, MN. Product availability and features may vary by state. Each insurer is solely responsible for the financial obligations under the policies or contracts it issues. Variable products are distributed by Securian Financial Services, Inc., member FINRA. 400 Robert Street North, St. Paul, MN 55101.
